

Aniket Kumar Gupta

aniiigupta23@gmail.com - [LinkedIn](#) - [GitHub](#) - [LeetCode](#) - [+91-8076206264](#)

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL
Backend: Node.js, Express.js, FastAPI, Strapi CMS, REST APIs
Databases: MongoDB, PostgreSQL, MySQL, Firebase, Supabase
AI/LLM: AI API integration, prompt engineering, LLM-powered automation pipelines, RAG (Retrieval-Augmented Generation) chatbots
Frontend: React.js, Next.js, Angular, Tailwind CSS, Redux, Zustand, Zod, Styled-Components, Figma
DevOps & Cloud: Docker, Contabo VPS, Railway, Render, Git/GitHub, Cloudinary, CI/CD workflows
Achievements: HackerRank 5-star • LeetCode 200+ problems solved

Work Experience

- Full Stack Developer**
Anarish Innovations Pvt. Ltd.

Faridabad (Hybrid)
Feb 2026 – Present

 - Engineered and deployed **6+** scalable full-stack web applications using **Next.js, Angular, React.js, Node.js, and Tailwind CSS**, delivering pixel-perfect UI implementations from Figma designs with **30%** fewer design-QA revision cycles.
 - Built a comprehensive **IMS (Inventory Management System) SaaS platform** covering inventory tracking, role-based access control (RBAC), analytics dashboards, order workflows, billing, and reporting – cutting manual stock-tracking effort by **40%** for **50+** end users.
 - Developing the **backend for a Project Management System (PMS)** using **Node.js** and **PostgreSQL** – designing REST APIs for task tracking, team collaboration, project timelines, and role-based permissions.
 - Architected and optimized **PostgreSQL** database schemas and integrated **Strapi CMS** for dynamic content management, reducing content-update turnaround time by **35%** and improving query performance by **25%**.
 - Containerized applications with **Docker** and managed deployments on **Railway** (CI/CD, deploy time cut from **45** to **10** min); integrated **Cloudinary** for secure media handling and CDN delivery, cutting asset load time by **40%**.
 - Collaborated in Agile sprints, independently owning **15+** features end-to-end while maintaining **95%** sprint on-time delivery and zero critical production bugs.
- Full Stack Developer (React.js + FastAPI)**
Naarivo Creations

Faridabad (On-site)
Oct 2025 – Jan 2026

 - Independently built a **production-grade FOIA automation system** covering all **50 U.S. states** and **3,000+ counties**, monitoring **10,000+** articles for large-scale compliance tracking.
 - Integrated **GPT-based LLM APIs** for automated structured insight extraction from unstructured data, achieving **~90%** extraction accuracy and cutting manual review time by **60%**.
 - Used **Supabase** as the primary database and auth provider; deployed on **Render** with zero-downtime workflows and **99.9%** uptime.
 - Developed scalable Python pipelines for article fetching and parsing, processing **500+** articles/day via RESTful APIs built with FastAPI.

Projects

- AuraHRMS – Human Resource Management System**

Next.js, React.js, Node.js, PostgreSQL, TypeScript, Tailwind CSS, REST APIs, RBAC

[Live Demo](#)

 - Developed a **multi-module HRMS platform** streamlining employee management, attendance, leave, and organizational workflows through a centralized dashboard; currently in **beta testing**, with an active pilot conversation underway for real-world deployment with a company.
 - Implemented **role-based access control (RBAC)** with secure authentication, supporting **5+** distinct permission roles across organizational hierarchies.
 - Designed and optimized **PostgreSQL database schemas** for employees, departments, attendance, and leave management, reducing query response time by **30%**.
 - Built **40+** responsive, reusable **React/Next.js components** and scalable **Node.js REST APIs** for core HR operations, with full validation and error handling across frontend-backend workflows.
 - Integrated a **RAG-based HR chatbot** allowing employees to query HR policies and information in natural language, with an admin interface for owners to upload company documents to continuously expand the bot's knowledge base.
- AtEats – Full Stack Food Ordering Platform**

MERN Stack, TypeScript, Next.js, Redux, Zustand, Zod, Stripe, Tailwind CSS, JWT

[Live Demo](#)

 - Built a full-stack food ordering app with JWT auth, email verification, and role-based access (admin/user); integrated **Stripe payments** with webhooks, processing **200+** test transactions with **100%** confirmation reliability.
 - Built an admin panel with full CRUD for restaurants, menus, and orders; used **Zustand** for global state and **Zod** for end-to-end schema validation across **30+** API endpoints.
 - Delivered a mobile-first UI with Tailwind CSS and a reusable component architecture, achieving a Lighthouse performance score of **90+**.

Education

- University School of Automation & Robotics (USAR)**
B.Tech – Industrial Internet of Things

Delhi
2021 – 2025

CGPA: 7.87
